

Summary

ABOUT ME

I left a steady job and salary raises to take a leap of faith: a frontend development internship in Japan. That experience sparked more than just career growth—it solidified my passion for building purposeful and intuitive digital products. With roots in project management and digital marketing, I've developed a strong foundation in communication, problem-solving, and agile workflows. Over time, I leaned deeper into development and design, culminating in a focused mission to build SaaS products and web apps that are scalable, user-friendly, and visually sharp.

Experience

WORKS

Frontend Developer

YF Agency · Internship On-Site · Oct 2024-Now

Tokyo, Japan

- Built a scalable and modern frontend foundation using Next.js, TypeScript, and Supabase, enabling the business to expand its digital product capabilities.
- Collaborated closely with the UI/UX team, improving developer–designer workflows and implementing clean, maintainable code across projects.
- Assisted in implementing Framer-driven product solutions, enabling quicker release cycles and helping the team validate MVPs more efficiently.
- Optimized internal workflows and development processes by crafting custom code solutions in platforms like Shopify and Webflow, enhancing flexibility and delivery speed.
- Mentored teammates on Next.js best practices while self-learning emerging technologies such as Shopify Liquid to support diverse project demands.

Freelance Frontend Developer

- Designed and built responsive, user-focused interfaces with accessibility and performance in mind.
- Applied SEO best practices to improve visibility and structure.
- Quickly adapted to new tools and frameworks to meet diverse client needs.
- Supported junior developers by sharing frontend best practices and guidance.

Project Manager

PRIMARIU · Internship On-Site ·

Guimarães, Braga, Portugal

- Managed ecommerce project timelines, ensuring on-time deliveries.
- Proficient in Agile (SCRUM) methodologies for adaptable project management.
- Efficiently tracked tasks and priorities using Jira
- Bridged client-developer communication with clarity.
- Proactively solved problems, fostering adaptability and creativity.
